

# Meet Microsoft Surface Duo 2

Two screens, limitless possibilities

Open two screens and discover limitless possibilities in the moment, wherever you are, with lightning-fast 5G.<sup>1</sup> **Surface Duo 2** is more than a phone, with an expansive view that enables you to compare and contrast content across Microsoft 365 apps, work in two apps side-by-side, and naturally write ideas on screen.<sup>2</sup> On two screens, your email, meetings, Android apps, and calls are more immersive, so you can communicate, collaborate, and do everything better.

## Do more with two screens

Two screens unlock a new level of multitasking in Microsoft 365 apps. Draft an email while you reference your client's profile. Monitor real-time production and jot down insights side by side. See people in your Microsoft Teams video call on one screen and engage in the meeting chat on the other.

## Get it done fast with 5G

Get done what matters in the moment. Cloud-first Microsoft 365 apps and 5G connectivity mean you can pull the latest sales data from Power BI to finish that PowerPoint Presentation, meet in the best Microsoft Teams experience on mobile, and bring in an expert anytime with a Dynamics 365 Remote Assist video call.

## Deploy, manage, and stay secure from anywhere

Unlock real value for your business with technology that empowers your employees to work securely from anywhere. Microsoft security is built in down to the firmware level, and cloud-based management keeps you in control. Rest easy knowing that you're working with an Android Enterprise Recommended device.

## Designed to inspire your innovation

Two incredibly thin, high-resolution displays — brighter and larger than before — open to one expansive view with a Revolutionary Hinge, enabling countless ways to be productive. Work in apps side by side, like when you jot down notes with Surface Slim Pen 2 on one screen while taking a video call on the other.

### Disclaimer

<sup>1</sup>5G not available in all areas; compatibility and performance depends on carrier network, plan and other factors. See carrier for details and pricing.

<sup>2</sup>Some devices, accessories, and software sold separately. Additional fees and/or subscriptions required for some apps and features. Available apps may vary by carrier and over time. Calling requires data plan; see carrier for pricing and coverage details. United States and Canada: Some features, including drag and drop between screens, available in supported apps only. Countries excluding United States and Canada: Search bar and available apps may vary by customer choice or carrier and over time.

### Disclaimer

\*Sold Separately.

<sup>1</sup>Excluding Surface Duo Bumper.

<sup>2</sup>Local video playback: Testing conducted by Microsoft in September 2021 using preproduction Surface Duo 2 units and software. Testing consisted of full battery discharge during local video playback on a single screen. Video playback consisted of a repeated 30-minute .mp4 file in 1080p at 24 fps. Device was connected to a cellular network and Wi-Fi was associated with a network. All settings were default except: Wi-Fi 'ask to join' and Adaptive Brightness were disabled, and screen was set to 100 nits. Battery life varies significantly with network and feature configuration, signal strength, settings, usage, and other factors. Battery has limited recharge cycles and cannot be replaced.

Talk time: Testing conducted by Microsoft in September 2021 using preproduction Surface Duo 2 units and software. All settings were default, and device was connected to a cellular network and Wi-Fi was enabled but not connected. Battery life varies significantly with network and feature configuration, signal strength, settings, usage and other factors. Battery has limited recharge cycles and cannot be replaced.

<sup>3</sup>Specified minimum dual battery capacity is 3462mAh.

<sup>4</sup>Network availability and coverage vary by carrier. See your carrier for details.

<sup>5</sup>Use of eSIM requires a wireless service plan (which may include restrictions on switching service providers and roaming, even after contract expiration). Not all carriers support eSIM. Use of eSIM in Surface Duo 2 may be disabled when purchased from some carriers. See your carrier for details.

<sup>6</sup>System software uses significant storage space. Available storage is subject to change based on system software updates and apps usage. 1 GB = 1 Gigabyte. 1 TB = 1,000 GB. See [Surface.com/Storage](https://www.microsoft.com/surface/Storage) for more details.
